### **SEWER**

- Connections must be tight, odor free and not dripping on the ground.
- Do not put a slinky style sewer pipe directly into the sewer connection. Gravity and suction can pull the pipe into the sewer main and cause major blockages.
- It is your responsibility to educate yourself on proper trailer dumping techniques to prevent blockages in your trailer or at your connection to the sewer main. We are always available to walk your through the correct way of processing the waste from your trailer to the sewer main.
- We have septic systems within our park, which means normal waste (fecal matter, urine, septic safe toilet paper and water) should be the only thing you dump into the septic main. Grease, harsh chemicals, paper towels and sanitary napkins will over time disrupt or damage these septic systems.

### **ELECTRIC**

- Electric is our largest cost. We spend over \$25,000 per year. In effort to keep everyone conscious of this enormous cost we have installed meters on almost every site. The rate is computed at the same rate the electric company bills LCC.
- Seasonal campers are allowed up to \$50. Monthly campers are allowed up to \$25. Electric use per year, over the allowance, will be billed to you at the end of the season.
- Campers are expected to pay their electric bill promptly.
